## AMBIENTE COLLECTION

### SCOPE

SCOPE is a puristic concrete reproduction tile for inside the home.

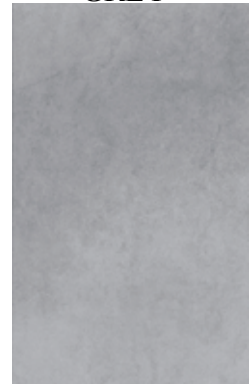

It perfectly reproduces the unmistakable industrial look of polished concrete floors, even down to the typical salt effect detail. With its semi-matt surface and fine veining, SCOPE enhances the 'loft' living environment where contrasting materials are deliberately made the focal point. The large scale tiles in high quality *vilbostone* porcelain stoneware are ideal for living rooms, bathrooms and kitchens.

*Vilbostone* porcelain stoneware offers unchanging beauty and shows little sign of wear even after many years' use. Thanks to its particular hardness, *vilbostone* shines with strength and extraordinary durability, and is resistant to frost and chemicals. Unlike real concrete floors, which often need to be sanded repeatedly once they have set, Scope is ready to use directly after laying and jointing.
